SUMMARY

I am a Computer Science student dedicated to web development with hands-on experience in HTML, CSS, JavaScript, PHP, and Java. My focus is on creating dynamic and responsive web applications that enhance user experience. I thrive in innovative environments, tackling challenges with strong problem-solving skills

EXPERIENCE

Figma to Code Intern

Inlancer Technologies

01/2023 - 01/2023 Rajkot, Gujarat, India

A technology company focused on web development and design solutions

- Converted Figma UI/UX designs into responsive web pages using HTML, CSS, and JavaScript
- Ensured pixel-perfect implementation of design components
- Worked on responsive layouts and modern UI design practices
- Collaborated with the development team to optimize frontend performance and user experience

EDUCATION

Diploma in Computer Science

Marwadi University

08/2022 - 05/2025 India

B.Tech in Computer Science and Engineering

Ganpat University

08/2025 - 05/2026 India

10th Grade

Swami Vivekanand School

06/2022 - 06/2022 India

KEY ACHIEVEMENTS

Vehicle Tracking System

Developed a vehicle tracking system that provides real-time location monitoring and enhances road safety

SKILLS

Gmail	HTML	CSS	JavaScript
PHP	Java	Responsive Web	
Figma	Python	Bootstrap	
Google Firebase		GitHub	

PROJECTS

Multi-Service Booking system

01/2023 - 02/2023

A comprehensive booking platform for various travel services

- Created a multi-service booking website supporting train, bus, hotel, taxi, bike rental, and tour bookings
- Integrated secure user authentication and payment functionality using PHP, MySQL, and JavaScript

Vehicle Tracking System

03/2023 - 04/2023

A web application aimed at enhancing vehicle tracking and safety

- Developed a web-based vehicle tracking system to monitor real-time vehicle location and movement
- Implemented features such as overspeed detection, route monitoring, and road hazard alerts
- Built the frontend using HTML, CSS, and JavaScript with backend integration using PHP and MySQL
- Designed the system to improve road safety and provide efficient vehicle monitoring for users
